## Course Outline

Laparoscopic surgery has become an integral part of every surgeon's practice. Procedures like diagnostic laparoscopy, cholecystectomy and appendicectomy are now a patient demand as also surgeon preference. Patients want to recover faster and get back to work quickly. Every surgeon practicing today needs to understand the principles and fundamentals of laparoscopic surgery and avoid compromises and complications. This four-day course is focused on acquiring basic laparoscopic skills which will enable the surgeon to practice this art of surgery with confidence. The candidates will also get an opportunity to learn and interact with renowned laparoscopic surgeons.

At the end of the course a certificate from IAGES certified training centre will be awarded to them.

## Course Objectives

- To understand the basic three dimensional view of the operating field.
- To gain proficiency in two-handed dissection and improve hand-eye co-ordination with special emphasis on left hand movement.
