Workshop Outline

Laparoscopic surgery has become an integral part of every surgeon's practice. Procedures like diagnostic laparoscopy, biopsy, cholecystectomy, appendectomy and hernia repair are now a patient demand as also surgeon preference. This is true even in the remotest part of our country. Patients want to recover faster and get back to work quickly. Every surgeon practicing today needs to understand the principles and fundamentals of laparoscopic surgery and avoid compromises and complications. This fifteen-day comprehensive course encompasses a novel approach towards laparoscopy.

The course promises extensive training at this aspect with complete enhancement of skills and techniques.

Daily visit to the operating room with adequate exposure for assisting live surgeries will give you a boost to overcome the difficulties in your own operating rooms.

Workshop Objectives

- To understand the basic anatomy during laparoscopy.
- To gain proficiency in two-handed dissection, improve hand-eye co-ordination with special emphasis on Lt hand movement.
- To familiarize with laparoscopic knot-tying and suturing.
- To review indications, technical details and possible pitfalls in laparoscopic, cholecystectomy, appendectomy, diagnostic laparoscopy, and laparoscopic hernia repair.
- To understand prevention and management of complications of various laparoscopic procedures

Who Will Attend?
